Welcome from the UF DPD Director

Welcome and thank you for your interest in the Didactic Program in Dietetics (DPD) housed in the Food Science and Human Nutrition Department (FSHN) at the University of Florida (UF). The 2018 U.S. News and World Report recognizes UF as a top 10 best public university. As part of UF, our department provides a dynamic and challenging environment for undergraduate study. Students have an opportunity to learn from nationally recognized nutrition, dietetic, and food science experts, as well as participate in abundant paid and volunteer opportunities within the community. In addition, many students choose to participate in a food- or nutrition-focused summer study abroad course located in places like Italy, Spain, and Greece.

Our curriculum emphasizes the science of nutrition, medical nutrition therapy, and food systems management. Students gain experience through participation in group projects, case studies, counseling scenarios, and behavioral research. This combination of knowledge- and application-based learning provides a solid foundation for critical thinking and problem solving.

The undergraduate DPD provides a foundation for developing knowledge and competencies in the core areas of dietetics practice (i.e., clinical dietetics, community nutrition, and food service/systems management) and promotes academic ability to succeed in graduate education and/or a dietetic internship. The emphasis is on developing didactic skills that will help them succeed with their goal to be accepted into and complete a competitive dietetic internship.

Feedback from UF DPD graduates often mention “how prepared and confident” they are during their dietetic internship. To highlight this, in the past five years, UF DPD graduates have had between 93% – 100% placement rate into competitive dietetic internships located in 16 states and one territory of the United States; the average national dietetic internship placement rate is approximately 50%.

Our DPD is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics (the Academy or AND), 120 S. Riverside Plaza, Suite 2190, Chicago, IL 60606-6995, 1-800-877-1600.

If you would like additional information on the UF DPD program, please call me at 352-273-3471 or email me at gankofskie@ufl.edu.

Sincerely,
Beth T. Gankofskie, PhD, MS, RDN
Instructor and Program Director
Congratulations!

Congratulations for joining the dietetics major within the Food Science and Human Nutrition Department in the College of Agricultural and Life Sciences. Dietetics is a challenging and rewarding profession that applies the science of food and nutrition to the health and well-being of individuals and groups.

The Didactic Program in Dietetics (DPD) at the University of Florida (undergraduate program) is a science- and research-based program that is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics (AND), 120 South Riverside Plaza, Suite 2190, Chicago, IL 60606-6995, 312-899-0040, acend@eatright.org. The Accreditation Council for Education in Nutrition and Dietetics (ACEND) is the Academy's accrediting agency for education programs, preparing students for careers as Registered Dietitian Nutritionists (RDNs) or Nutrition and Dietetics Technicians, Registered (NDTRs).

ACEND exists to serve the public by establishing and enforcing eligibility requirements and accreditation standards that ensure the quality and continued improvement of nutrition and dietetics education programs. Programs meeting those standards are accredited by ACEND.

ACEND is recognized by the United States Department of Education as a Title V gatekeeper. This affirms that ACEND meets national standards and is a reliable authority on the quality of nutrition and dietetics education programs. ACEND is also a member of the Association of Specialized and Professional Accreditors (ASPA).

Successful DPD program completion enables you to compete for placement in accredited dietetic internship programs, a required step in becoming a Registered Dietitian Nutritionist (RDN).
Overview of the College and Department

The College of Agricultural and Life Sciences (CALS) administers the degree programs of the University of Florida’s Institute of Food and Agricultural Sciences (UF/IFAS). IFAS is a federal-state-county partnership dedicated to developing knowledge in agriculture, human and natural resources, and the life sciences, and enhancing and sustaining the quality of human life by making that information accessible.

The Food Science and Human Nutrition Department (FSHN) is one of the world’s largest combined academic programs where food science, nutritional sciences, and dietetics are all studied within one department. After completing undergraduate degrees, FSHN students typically move on to employment in the food industry or healthcare settings, graduate or professional programs. The FSHN department has a strong record of excellent placement of our graduate students in industry, professional organizations, academia and government. Furthermore, the FSHN faculty have trained at institutions from around the world and they have been widely successful in their teaching, research, and extension efforts. Throughout the programs of food science, nutritional sciences, and dietetics, our faculty is recognized nationally and internationally as experts in their respective fields.

FSHN occupies four buildings centrally located on-campus, and several research laboratories in the Lake Alfred Citrus Research and Education Center. This combined space is dedicated to research, extension and teaching programs, providing a multitude of space well-equipped with a variety of analytical instrumentation, equipment and research-scale pilot plants. In addition, FSHN has a clinical nutrition laboratory, two professional taste-panel facilities, a new experimental foods kitchen laboratory, and numerous teaching laboratories.

Interim Director and Lecturer
What is a Registered Dietitian (RD) and Registered Dietitian Nutritionist (RDN)?

A Registered Dietitian (RD), also known as a Registered Dietitian Nutritionist (RDN), is an individual who has completed the following requirements:

- Minimum of a bachelor’s degree from a US regionally accredited institution
- Academic requirements from an ACEND-accredited Didactic Program in Dietetics
- A dietetic internship program from an ACEND-accredited program
- Successfully passed the Registration Examination for Dietitians administered by the Commission on Dietetic Registration (CDR)
- Maintained continuing professional education (CPE/CPEU) requirements

The title Registered Dietitian (RD) has been used by practitioners for over 50 years. Either designation is acceptable, but most registered dietitians have transitioned to Registered Dietitian Nutritionist to emphasize his or her nutrition expertise.

What is a Licensed/Certified Dietitian?

Many states have a certification or license requirement practitioners must acquire in order to practice dietetics. Each state requirement is different, and information can be found on that individual state’s dietetic association website. Florida has a licensure requirement for dietitians.

What can I Expect from Employment as an RDN?

Registered Dietitians Nutritionists are employed in hospitals and other health care facilities, government and public health agencies, for-profit companies, non-profit food and/or nutrition related organizations, schools and universities, private practice, and a variety of other settings. Opportunities for RDNs to be employed in wellness and sports nutrition programs, as well as sales and marketing for business and industry, are also increasing. The U.S. Bureau of Labor Statistics reports that the job market for dietitians will grow at 14%, faster than the average of other health care professions, through 2026 because of the increased emphasis on disease prevention, the aging population, and the public’s interest in nutrition.

Career opportunities for graduates include:

- Clinical Dietitian/Nutritionist (in a health care setting, including acute and long term care and facilities specializing in rehabilitation and eating disorders)*
- Public Health or Community Nutritionist*
- Consultant Dietitian in Private Practice*
- Sports Dietitian*
- Nutrition Educator or Teacher
• Nutrition Specialist (for food industries)
• Restaurant Manager
• Supermarkets
• Food Service Director (in acute care hospitals, extended care facilities, educational institutions)
• Pharmaceutical/Medical Sales Representative
• Nutraceutical Industry
• Corporate Wellness
• Culinary Arts
• Public Policy Development
• Non-profit Advocacy Groups/Organizations
• National and International Health Organizations
• Research
• Graduate School
• Nutrition Writer
• Private Practice

*Requires RD/RDN and/or LD/N

Dietitian Salaries:
The median salary amongst Registered Dietitians and Registered Dietitian Nutritionists (in all positions) is $63,340 per year according to the Academy’s 2017 Dietetics Compensation and Benefits Survey. Compensation varies based on the type of position, length of employment, geographic location, and supply of RDNs. Typically, compensation ranges from approximately $47,800 (10th percentile) to $100,000 (90th percentile). See the Academy of Nutrition and Dietetics for more information.
DPD Mission Statement

The mission of the Didactic Program in Dietetics at the University of Florida is to provide a progressive and effective program to educate students using a science-based food and nutrition curriculum to produce graduates who are prepared for supervised practice. This will lead to eligibility for the CDR credentialing exam to become a registered dietitian nutritionist, prepared as future dietitians and nutrition professionals.

DPD Program Goals, Objectives, and Outcome Measures

Goal 1: Graduates who are well prepared for dietetic internships or health or science-related professions or graduate school.*

1.1.0 Objective: Graduates will agree they are prepared to apply to a dietetic internship.

1.1.1 Outcome Measure: 60% of DPD graduates will apply to dietetic internships within one year of graduation.

1.2.0 Objective: Graduates will agree they are or will be enrolled in a dietetic internship within 1 year.

1.2.1 Outcome Measure: 60% of those applying to dietetic internships will be accepted within 1 year of graduation.

1.3.0 Objective: Students with junior standing (60 credits of general education requirements completed) will complete the program within three years (150%) of the time planned for completion.

1.3.1 Outcome Measure: 80% of students with junior standing will complete the program/degree requirements within 3 years (150%) of the time planned for completion.

1.4.0 Objective: Graduates eligible to take the CDR Registration Examination for Dietitians will take the exam and pass it within one year following the first attempt.

1.4.1 Outcome Measure: Of the graduates eligible to take the CDR Registration Exam for Dietitians, 80% will take the exam and pass it within one year following the first attempt.

1.4.2 Objective: Graduates over a 5-year period will pass the CDR credentialing exam for dietitian nutritionists within one year following the first attempt.

1.4.3 Outcome Measure: The 5-year pass rate for the CDR credentialing exam for dietitian nutritionists within one year following the first attempt will be 80%.

1.5.0 Objective: Graduates who did not seek a dietetic internship will attend graduate school or be employed in a health or science related profession within one year of graduation.

1.5.1 Outcome Measure: Of graduates who did not seek a dietetic internship, 50% will attend graduate school or obtain employment in a health or science related profession within one year of graduation.

1.6.0 Objective: Graduates will rate their preparation for internship, graduate school or employment as satisfactory or higher.
1.6.1 Outcome Measure: 80% of graduates will rate their preparation for dietetic internships, graduate school, or employment as satisfactory or higher.

1.7.0 Objective: Internship directors will rate the graduates as being well-prepared for the dietetic internship.

1.7.1 Outcome Measure: 90% of internship directors will rate the graduates as being well-prepared for the dietetic internship.

Goal 2: Graduates who exhibit critical thinking and problem-solving skills.*

2.1.0 Objective: Graduates will agree that they received opportunities to develop critical thinking and problem-solving skills as undergraduates.

2.1.1 Outcome Measure: 80% of graduates will agree that they received opportunities to develop critical thinking and problem-solving skills as undergraduates.

2.2.0 Objective: Internship directors will agree that the graduates were prepared in critical thinking and problem solving.

2.2.1 Outcome Measure: 80% of internship directors will agree that the graduates were prepared in critical thinking and problem solving.

*Note: Outcome measures based on responses from participants who return the surveys of students, graduates, and program directors.
Curriculum

The DPD Program at the University of Florida meets the Accreditation Council for Education in Nutrition and Dietetics (ACEND) Foundation Knowledge and Learning Outcomes. Students must successfully complete all courses on the DPD curriculum sheet as one step in eligibility to receive a verification statement. The curriculum is developed to be sequential so that students move from basic knowledge to applied knowledge and skills. It is important for students to follow the semester-by-semester sequencing, especially in the senior year sequence, because some courses are not offered every semester. You should check with your academic advisor if you have questions.

If you choose not to complete an internship, the strong biological and social science foundation of the program also provides you with the knowledge and skills for a variety of health-related professional programs or employment as a nutrition educator, food service manager, pharmaceutical sales representative, or a variety of other challenging positions.

A sample 4-year schedule is found on page 10 (actual schedules will vary):

Key to when courses are offered:
- F = Fall, S = Spring, SS-A = Summer A, SS-B = Summer B, SS-C = Summer C, SS-A/B = Summer A and B
- These are subject to change; please see your advisor.

* Must complete in two attempts with C or better including withdrawals.

Bolded courses are tracking course; students must have a 2.5 or higher to stay in the major.
Dietetics Sample Course Schedule

### FRESHMEN YEAR

**FALL**
- CHM2045 General Chemistry (3)
- CHM2045L General Chemistry Lab (1)
- MAC1147 Pre-calculus (4)
- Humanities/Social Behavior (3)
- COMPOSITION (3)
- ELECTIVE (1)

**SPRING**
- CHM2046 Qualitative Analysis (3)
- CHM2046L Qualitative Analysis Lab (1)
- AEB2014 Econ Issues (3)/ECO2023-Micro or Macroeconomics (4)
- PSY2012 General Psychology (3)
- ELECTIVE (3)

Electives
The following courses are recommended as electives (although you are not restricted to this list):

### Business and Policy
- AEB 3300 (3) Agricultural and Food Marketing
- LEI 3830 (3) Principles of Travel and Tourism
- LEI 3360 (3) Hospitality Management
- MAN 3240 (4) Organizations: Structure and Behavior
- MAN 4301 (4) Human Resource Management
- MAR 3023 (4) Principles of Marketing

### Psychology
- APK 3400 (3) Intro Sport Psychology
- DEP 3053 (3) Developmental Psychology
- DEP 4464 (3) Psychology of Aging
- EDF 3110 (3) Human Growth and Development
- EDF 3210 (3) Educational Psychology
- PSB 3002 (3) Physiological Psychology

### Communication
- AEB3114L (1) Introduction to Agricultural Computer Applications
- ALS 3203 (3) PC Use in Agriculture
- AEE 3073 (3) Intercultural Communication
- AEE3313 (3) Development and Role of Extension Education
- COM 4022 (3) Health Communication
- EDF2085 (3) Teaching Diverse Populations
- SDS 4410 (3) Interpersonal Communication Skills
- SPC 2300 (3) Introduction to Interpersonal Communication
- SPC 2351 (3) Listening (Spring Only)
- SPC 4425 (3) Small Group Communication
- ANO 2630 (3) Contemporary Moral Issues
- SYG 2000 (3) Principles of Sociology
- SYG 2010 (3) Social Problems
- SYG 2430 (3) Marriage and Family
- SYO 4400 (3) Medical Sociology

### Social and Historical Constructs
- ANT 4462 (3) Culture and Medicine
- EEX 3093 (3) Exceptional People in School and Society
- PHI 2630 (3) Contemporary Moral Issues
- SYG 2010 (3) Social Problems
- SYG 2430 (3) Marriage and Family

### Health and Wellness
- FOS 4202 (2) Food Safety and Sanitation
- FOS 4222 (3) Food Microbiology
- FOS 4722C (3) Quality Control in Food Systems
- FOS 4731 (2) Government Regulations and the Food Industry
- HSC 3102 (3) Personal and Family Health
- HSC 3143 (3) Drug Education
- HSC 3201 (3) Community and Environmental Health
- HSC3537 (3) Health and Medical Terminology
- HSC 3574 (3) Nutrition Education for Special Populations
- HSC 4624 (3) Trends in International Health
- HUN4936 (2) Preventative Health Experience
- APK 2100C (4) Applied Human Anatomy with Laboratory
- SDS 3481 (2) Alcohol and Drug Abuse
- SDS 3482 (3) Stress and Anxiety Management
- MDU 4850 (3) The Diseases of Eating
- WST 4930/6935 (3) Women’s Health and Well-being
Are there any GPA Requirements for the Dietetics Program?

Yes! Students in the Dietetics program must maintain a minimum 2.50 average GPA in their tracking courses or they will be required to change majors. However, it should be noted that higher GPAs are essential for dietetic internship program admission. Due to the current competitive nature of the dietetic internships, students should have a 3.2 or higher overall GPA.

All transfer students must have successfully completed these tracking courses before admission. Tracking courses for the Dietetics program are:

**General Chemistry Sequence**
*CHM2045 – General Chemistry I (3)*
*CHM2045L – General Chemistry I Lab (1)*
CHM2046 – Qual Analysis Chemistry II (3)
CHM2046L – Qual Analysis Chemistry II Lab (1)

*The following course sequence at a Florida college or other university is equivalent to CHM2045 & Lab: CHM2040/1040 & Lab + CHM2041/1041 & Lab*

**General Biology Sequence**
BSC2010 – Principles of Biology I
BSC2010L – Biology I Lab
BSC2011 – Principles of Biology II
BSC2011L – Biology II Lab

**Mathematics Sequence**
MAC1147 Precalculus
or a combination of both
MAC1140 & MAC1114 – Trigonometry

Dietetic students must successfully earn C+ or higher in all FSHN courses (listed below) to earn their verification statement. The verification statement is required to enter an ACEND-accredited dietetic internship. If a student fails to receive a C+ in their HUN, DIE or FOS classes in their senior year, they will still graduate but must retake the courses within 2 years of graduation to earn a verification statement. If they retake a comparable course (after approval by the DPD Director), and receive a C+ or higher, then they will be eligible for a verification statement.

HUN2201 - Fundamentals of Human Nutrition (3)
HUN3403 - Nutrition through the Life Cycle (2)
HUN4221 - Nutrition and Metabolism (3)
HUN4445 - Nutrition and Disease I (2)
HUN4446 - Nutrition and Disease II (3)
FOS3042 - Introduction to Food Science (3)
FOS4311 - Food Chemistry (3)
FOS4310L- Experimental Foods Lab (1)

DIE3310 – Community Nutrition (2)
DIE4125 - Food Systems Management (3)
DIE4125L – Food Systems Management Lab (2)
DIE4245C - Medical Nutrition Therapy Applications I (3)
DIE4246C - Medical Nutrition Therapy Applications II (3)
DIE4436 – Nutritional Counseling/Communication (2)

What are the Admission Requirements to the DPD Program?

**Freshman and Transfer Admissions**
The admission process to the University of Florida as a freshman or transfer student is described on the UF Admissions website. The University of Florida provides equal opportunity to applicants.

Transfer admissions from a Community College, State College of Florida, or other universities requires a GPA of C+ in science and math courses (tracking courses in **boldface**) and an overall GPA of 2.0. In addition, community college students must have their A.A. degree before being considered.
Admission decisions are made in the College of Agricultural and Life Sciences administrative offices. **Note:** The dietetics major is competitive and highly-sought after by a large number of applicants; therefore, students with GPAs of 3.0 and higher are the strongest candidates for acceptance to the major.

Students who want to transfer from another major within UF must have a GPA of 2.5 in the tracking courses and permission from the DPD Program Director or dietetics faculty. As mentioned above however, due to the number of applicants and rigor of the curriculum, students with more competitive GPA’s of 3.0 and higher are the strongest candidates for acceptance.

**What are the Admissions Requirements as a Post-baccalaureate?**

*Post-baccalaureate is only for students with a bachelor's degree from an accredited U.S. college or university.*

**BE AWARE:** THIS IS NOT AN ONLINE PROGRAM! PHYSICAL RESIDENCE WILL BE REQUIRED FOR SUCCESSFUL COMPLETION.

If a student already has a degree in another field and is interested in becoming a Registered Dietitian, the UF DPD program has a very limited number of spaces for students seeking a second degree.

The UF Didactic Program in Dietetics (DPD) has a separate admission process and requirements for post-baccalaureate admissions. Space is limited and may not be available to all applicants. Number of spaces will vary depending on the current enrollment of the undergraduate students and space cannot be guaranteed. The application deadline is October 1 for admission to the spring semester and June 1 for the fall semester. The post-baccalaureate program requires a minimum of 30 semester hours earned at UF in dietetics, with the conferring of a second bachelor’s degree, in order to be eligible for a verification statement from the UF DPD program. All Dietetic courses (with a prefix DIE) must be taken at the University of Florida to receive the required academic verification statement. For more detailed information and application procedure, contact Dr. Gankofskie (UF DPD Director) at gankofskie@ufl.edu.

There are two additional costs associated specifically with this program: student membership in the Academy of Nutrition and Dietetics ($58/yr.) and the ServSafe® Book and Exam ($80). There is also potential travel cost to facilities for class projects. After completing the post-baccalaureate program, receiving a bachelor’s degree and your verification statement, you must also be accepted into and complete an accredited dietetic internship and pass the RD Exam to become a Registered Dietitian Nutritionist.

**What is Needed to Apply as a Post-baccalaureate Student?**

You must have:
- Overall GPA of 3.0 or higher from your undergraduate degree.
- Tracking course GPA of C+ or higher. Tracking courses: BSC 2010 and lab, BSC2011 and lab, CHM2045 and lab, CHM2046 and lab, and MAC1147 (or a combination of Pre-Calculus and Trigonometry). Each with C+ grade or higher.
• Preferred but not required: two semester sequence in Organic Chemistry (grade of C or better in Organic Chemistry I, C+ or better in Organic Chemistry II), Introduction to Nutrition course, Statistics course.
• All tracking courses must have been completed within ten years of when the applicant is seeking to start the DPD program, otherwise out-of-date courses will need to be retaken.
• All professional courses must have been completed within five years of when the applicant is seeking to start the program.

Contact Information:
Dr. Beth Gankofskie, PhD, MS, RD/N, Director of the Didactic Program in Dietetics, University of Florida, CALS, FSHN department
• Mailing address: PO Box 110370, Gainesville, FL 32611
• Email: gankofskie@ufl.edu Phone: 352-273-3471.
You may also contact Herschel Johnson, student services-advising at: hdjohnson@ufl.edu.

What are the Costs of the DPD Program?

Tuition, books, and other fees are listed on the UF Admissions Tuition and Fees webpage.

Additional costs for the DPD program may include:
• Lab fees for specific courses (2013)
  ▪ DIE3310 Community Nutrition $10.00
  ▪ HUN 4445 Nutrition and Disease 1 $2.02
  ▪ DIE 4246 Medical Nutrition Therapy $11.00
  ▪ DIE 4125 Food Systems Management $3.17
  ▪ DIE4125L Food Systems Management Lab $46.50
  ▪ FOS4310L Experimental Foods Lab $26.97
  ▪ FOS3042 Introduction to Food Science $2.00
  ▪ BCH3025 Biochemistry $4.00
• Academy of Nutrition and Dietetics Membership ($58.00 per year) required by fall of junior year or after 60 credits (you are encouraged to join at the beginning of the program).
• A subscription to the Electronic Nutrition Care Process Terminology (eNCPT) is required for DIE4245 and DIE4246 ($25.00).
• Transportation cost for required class assignments
  ▪ Students are required to complete assignments in DIE 4125 and lab, DIE 3310 and DIE4245C, which take them off campus to Alachua County Schools or local hospitals. Travel costs range from $10-$20 for all travel.
• Transportation costs for volunteer or shadowing experiences – Costs will vary depending on facility; many volunteer experiences are available by walking or bus; additional travel could range from $20-$30.
• Application fees and mailing costs for dietetic internship or graduate programs (costs vary depending on the program and number of applications and mailing costs).
  ▪ DICAS Application Fee (online; $40.00 for first application, $20 for each additional)
  ▪ D&D Digital (Computer Matching): $50.00
• ServSafe® book and exam (required in DIE4125L, Food Systems Management Lab) – ServSafe® Essentials with exam sheet, approximately $80.00.
What are the Policies and Procedures of the DPD Program?

- **Withdrawal and refund of tuition and fees.** The University of Florida has established deadline dates and procedures for withdrawal and refund of tuition and fees. For details, see [UF Fees and Fiscal Information](#).

- **Scheduling and program calendar.** The DPD Program follows the University of Florida academic calendar which is available on the [UF Dates and Deadlines](#).

- **Protection of privacy of information (confidentiality of student records).** The University of Florida, in accordance with the State University System rules, state statutes, and the Family Educational Rights and Privacy Act of 1974 (i.e. the Buckley Amendment) assures the confidentiality of student educational records. However, student educational records may be released without the student's consent to school officials who have a legitimate educational interest to access the records, and the university may disclose information from a student’s educational records to either individuals or entities permitted under applicable federal and state law. Information on confidentiality of records is available in the [UF Undergraduate Catalog](#).

- **Access to personal files.** Students have the right to review their personal educational records for information and to determine accuracy. To review your student files, contact the Office of Student Services (located on the first floor of the Food Science and Human Nutrition Building) during their office hours. Students must show their student ID to review their files. Letters of recommendation or other materials to which the student has waived his/her rights will not be available for review by the student. Additional information, including procedures for challenging content of a student record, can be found at [UF FERPA and Confidentiality of Student Records](#).

- **Access to student support services, including health services, counseling and testing, and financial aid resources.** Student support services are available through the [Division of Student Affairs](#). Health services are provided through the Student Health Care Center, which is located at 1 Fletcher Drive (Building 280). Financial aid resources are available through the [University of Florida’s Financial Aid](#) office.

- **Grievance procedures.** The University of Florida defines a grievance as: “dissatisfaction occurring when a student believes that any decision, act, or condition affecting him or her is illegal, unjust, or creates unnecessary hardship. Such grievances may concern, but are not limited to, the following: academic problems (excluding grades, except when there is an allegation of illegal discrimination or where a grade penalty has been imposed without proper authority); mistreatment by any university employee; wrongful assessment of fees, records and registration errors; student employment and discrimination because of race, national origin, sex, marital status, religion, age, or disability.”
  - Student grievance procedures are outlined on the UF website and administered through the Dean of Students Office. If you feel that a grievance has occurred, you are encouraged to follow the steps described [here](#).
  - If students have followed the procedures at the University level and still believe that there has not been proper handling of the matter, the student has the right to file a complaint with ACEND, the accrediting agency of the DPD program. The procedures are listed on the [ACEND website](#).
• **Assessment of prior learning.** Prior coursework must be submitted to the Office of Student Services and the DPD Director for review. A prospective student will be notified of courses that will transfer and be provided with a plan of coursework required to complete the UF DPD. The DPD program at the University of Florida does not accept prior work or volunteer experience in lieu of coursework.

• **Formal assessment of student learning, performance, and progress.** Course syllabi for all dietetics courses include the evaluation method used in the specific course. Evaluation methods may include exams, case studies, presentations, individual and team projects, etc. Students receive a letter grade for the course as well as individual grades for assignments and exams. The DPD program has adopted the University +/- system for all DIE courses.
  
  o Student progress can be measured by accessing the degree audit on ONE.UF and by meeting with FSHN Student Services to determine if the student is on track towards graduation.

• **DPD retention and remediation procedures when student performance is not meeting the criteria for program progression.** Student progress in the program is determined in several ways. Students must complete the tracking courses (chemistry, biology, and math) with a C+ or higher in order to stay in the major. In addition, the students must achieve a C or better in CHM2210 (Organic Chemistry 1) in order to take CHM2211. If a student does not meet the tracking course requirement or the organic chemistry requirement, he or she has access to the FSHN Student Services Office, Career Resource Center, or the faculty advisor for advice regarding alternative majors.
  
  o Graduation requirements at UF are 2.0 GPA; the DPD does not have a separate requirement.

• **Disciplinary/termination procedures.** Students are required to follow the University of Florida Student Code of Conduct described at the UF Dean of Students Office.
  
  o All students must obey the Student Honor Code. On all work submitted for credit by students at the University of Florida, the following pledge is either required or implied: "On my honor, I have neither given nor received unauthorized aid in doing this assignment." Failure to comply will result in disciplinary action.

• **Graduation and/or DPD completion requirements.** The DPD follows the same graduation requirements as the University. Students must complete the program with a 2.0 GPA to receive a diploma. Other requirements can be found [here](#).

• **Current Verification Statement Policy.** After completion of all courses, program requirements and graduation in good standing, the DPD graduate will be issued six originals of the Verification Statement signed by the DPD Program Director. A copy is also kept as a permanent record in the Office of Student Services if a student requires additional copies.
  
  o **Requirements to receive a verification statement.** Verification statements will be issued if the graduate meets all of the following conditions:
    • Graduation from University of Florida with a 2.5 GPA or higher
    • Successful completion of all FSHN courses required in the DPD curriculum with a C+ or higher
    • Academy of Nutrition and Dietetics Student Member in senior year
    • ServSafe® certified

• **Verification statement procedures.** At the completion of the DPD program, all students should contact Student Services with post-graduation plans and a permanent mailing address. After graduation and verification by the registrar, the student will be issued six copies of the
verification statement. The verification statements should be kept in a safe place and are required for dietetic internships.

- **Email/listserv.** All students must have a UF email and be on the dietetics listserv. If you are not receiving emails from the listserv, please contact Herschel Johnson (hdjohnson@ufl.edu) to be added to the list. The listserv is used to provide information to you regarding courses, registration reminders, volunteer and work opportunities, and FSHN club meetings.

- **Dietetics classes attendance and tardiness.** Attendance is required for all DIE courses. Attendance will be taken at the beginning of each class. Excused absences will only be granted for the following reasons:
  - Death in the family as documented by a dated obituary
  - Illness or hospitalization as documented by a physician’s note related to that illness (vague notes such as “was seen” are not acceptable)
  - Religious holiday as documented by a written statement to the professor before the holiday
  - Professional/graduate school interviews with documentation of interview letter and travel arrangements
  - Accident as documented by a copy of the police report
  - Only students with excused absences will be allowed to make up the original work or suitable alternative if an exam or in-class assignment is missed. Absence from class will result in a penalty (as determined by faculty member) unless there is an unavoidable extenuating circumstance (subject to the faculty member’s discretion) that can be documented to the faculty member’s satisfaction.

- **Tardiness is unacceptable in the workplace and is also not appropriate in the classroom. It shows disrespect for the professor, other students in the class, and the course content. Students who are tardy (as defined by the professor of each class) will be penalized according to the policy established for that class.

- **Academy of Nutrition and Dietetics Membership.** Academy of Nutrition and Dietetics membership fosters commitment to the dietetics profession. As an Academy member, you are eligible for scholarships, have opportunities to network with other dietetic students and professionals, may access research in the Evidence Analysis Library, and learn about the profession. As an Academy member, you automatically become a member of the Florida Academy of Nutrition and Dietetics (unless you select a different state affiliation on the membership application) and are eligible to join the Gainesville Academy of Nutrition and Dietetics (GAND).

  - Note: DPD professional courses require use of resources that are limited to Academy members. All DPD majors must be members of the Academy of Nutrition and Dietetics by the Fall semester of their junior year or after 60 credits. Students must submit proof of membership (copy of Academy membership card) to Kohrine Counts, the Dietetics Program Coordinator, by September 15th each year. Student membership costs $58.00. Membership runs from June 1 – May 31.

- **Post-baccalaureate student policies.** For students completing the DPD program as a post-baccalaureate student, the following policies must be followed in addition to the DPD policies:
  - The post baccalaureate program requires a minimum of 30 credit hours and students receive a second Bachelor of Science degree (UF FSHN graduates with nutritional science specialization are exempt from 30 credit hour rule because they may not need to receive a second degree).
All dietetics courses (DIE) must be taken at the University of Florida to receive a verification statement.

What are the Characteristics of a Successful Dietetics Student?

A successful dietetics student is a:
⇒ Critical thinker and problem solver
⇒ Self-starter
⇒ Team player

...who has:
⇒ Good time management skills
⇒ Strong interpersonal skills
⇒ Effective stress management
⇒ Leadership ability
⇒ Integrity
⇒ Ability to prioritize
⇒ Volunteer and work experience
⇒ Good grades

...and is:
⇒ Responsible and mature
⇒ Pro-active
⇒ Goal-oriented
⇒ Adaptable and flexible
⇒ Organized
⇒ Self-disciplined
⇒ Committed to the profession

Is it Important to get Work or Volunteer Experience in the Dietetics Field?

In order to learn about the field of dietetics and to strengthen your application for a dietetic internship, it is strongly recommended that you work or volunteer in dietetics-related areas. Most internships require additional experience beyond coursework. You can do this during the summer or the school year. You are encouraged to contact local dietitians (or dietitians in your home town where you will be on weekends or school breaks) and request a volunteer experience. Opportunities for volunteer experiences are also sent via the listserv. You should keep a record of your hours in a log (signed by the supervisor regularly) and experiences for your internship application and resume. Currently, it is recommended you have at least 600 hours of volunteer/work experience in a nutrition-related position.

Why Should I Join the Food Science and Human Nutrition (FSHN) Club?

The FSHN Club is a student-run organization for students majoring or interested in any of the three majors (Dietetics, Nutritional Sciences, or Food Science) within the FSHN department. Meetings are held twice per month during the evenings of a selected weekday. The membership fee is $25.00 per year (subject to change) and includes membership in the Florida Section of the Institute of Food Technologists (IFT), for which this Club serves as the UF Chapter. (Although IFT is often erroneously considered an organization for Food Scientists, many RDNs are members and there are numerous nutrition-related job opportunities in the food industry.) In addition, FSHN club members are eligible for IFT scholarships.
Many interesting topics related to nutrition and food science are discussed at meetings. Presentations given by local professionals introduce students to the varied career opportunities in dietetics and other food-related careers. Dietetics-related volunteer and work experiences also are announced at these meetings. The Club participates actively in various events each year including the American Heart Association Heart Walk, March of Dimes Walk America, Campus Kitchens, and National Nutrition Month (in March). Club members also conduct fundraising and volunteer many hours to local charities and community organizations. Past volunteer activities have included food preparation and service at local soup kitchens and the Ronald McDonald House, donation of food to shelters for the homeless and abused women and children, and educational presentations on nutrition to local school children.

Many good things come from being a FSHN Club member. Information about the field of nutrition is provided, and you also get a chance to make new friends and meet the faculty. Being an officer or committee chair is an excellent leadership opportunity. We encourage all dietetics students to run for an elected position, serve on Club committees, and/or participate in other Club activities. For more information about the Club or its meetings, activities, and programs, go to the Student Services Office in (located on the first floor of the FSHN Building) or the FSHN Facebook page.

**What Scholarships are Available to Dietetics Students?**

There are scholarship opportunities available for you as a student in the Food Science and Human Nutrition Department, College of Agricultural and Life Sciences, and the University of Florida. Information about scholarships and financial aid can be found on the FSHN website.

Scholarships are also available through the Academy of Nutrition and Dietetics (AND) and the Florida Academy of Nutrition and Dietetics (FAND) and the Gainesville Academy of Nutrition and Dietetics (GAND) for student members of these organizations. For information about FAND and GAND scholarships and eligibility, please see the Academy website, the FAND website, and the GAND website.

**Where Do I Go for Advising?**

For academic advising, you should schedule an appointment with Herschel Johnson (hdjohnson@ufl.edu), the dietetics undergraduate advisor. The advisor will provide assistance in planning a schedule of required courses. For career advising, you should schedule an appointment with your faculty advisor (the name of your faculty advisor will be listed at the top of your Degree Audit in your one.ufl.edu account.

Your faculty advisor will provide information about professional organizations, work and volunteer opportunities, and planning for the future. **You should plan to schedule at least one advising appointment with an advisor each semester, and get to know your faculty advisor as soon as possible, but no later than your junior year.** To schedule any advising appointment, call Student Services at 352-294-3734, via e-mail at marianne@ufl.edu, or stop by Student Services in the FSHN building on the ground floor.
Should I Maintain a Portfolio of My DPD Work?

The DPD Faculty highly recommends that you maintain a portfolio of your accomplishments through your junior and senior year. A portfolio is a reflection of your knowledge, skills and accomplishments in the professional phase of the program. It is very useful when you are applying for dietetic internships, graduate programs and jobs. You can create a paper version in a three-ring notebook, an online version or a PDF document. Some basic information that should be included is:

- Resume
- Statement of career goals/interests
- Professional and student organization memberships, including leadership roles and examples of involvement (e.g., committee chair, Heart Walk participant, health fair organizer, newsletter articles written)
- Certifications (e.g.: ServSafe®, personal training certification, CAN, EMT)
- Scholarships, awards
- Volunteer and work experience (can be dietetics or non-dietetics related)
  - Log of hours worked
  - Examples of activities, level of responsibility and any materials created
- Professional memberships (Academy of Nutrition and Dietetics, Florida Academy of Nutrition and Dietetics, Gainesville Academy of Nutrition and Dietetics, Academy Practice groups)
- Leadership roles in professional organizations (e.g., Gainesville Academy of Nutrition and Dietetics committee member, etc.)
- Conferences attended (e.g., IFT, FAND Annual Symposium, other)
- Research
  - Thesis research project
  - Paid or volunteer research assistant
- Samples of applicable class work (e.g., brochures developed, special events, nutrition education programs, power point presentations, worksheets)

If you choose to do a three-ring notebook, you should use dividers, and everything should be typed and have a professional appearance. Do not make it look like a scrapbook; remember that the portfolio should serve as an example of your professionalism.

There are many software programs that are available if you choose to do an electronic version. UF offers free web space and hosting through your Gatorlink account; it is available until one term after graduation. An example from an alumnus can be found at [here](#). She used a website design software package called CoffeeCup. Examples of other website design software (some are free and some are not) include: Adobe Dreamweaver, Weebly, and WIX. Another option is to develop your portfolio in Word or PowerPoint and then create a PDF version you can take anywhere.

After Receiving My Dietetics Bachelor’s Degree From UF, Will I be a Registered Dietitian (RD/RDN)?

No! Completion of a Didactic Program in Dietetics (like the UF program) is only the first step required to become a Registered Dietitian Nutritionist.
The **second** step is the completion of an ACEND-accredited dietetic internship program. Eligibility for the dietetic internship includes the completion of the Didactic Program, and a minimum of a bachelor's degree. Receiving an appointment to a dietetic internship is very competitive, and completion of the UF DPD does not guarantee a dietetic internship. Students participating in the computer match apply to be selected for a dietetic internship. It has become more critical for dietetic students to plan early for the application process and to use the resources provided by the program such as spring workshop and DIE 4505 Seminar course.

The **third** and final step to becoming an RDN is successful completion of the National Registration Examination for Dietitians. It is very important to complete this step as soon as possible after finishing your dietetic internship. There are many study guides and programs available to help you prepare for success in this final step. Beginning in 2024, the Commission on Dietetic Registration, which administers the Registration Exam, will require students have a master’s degree to be eligible to take the examination. The master's degree may be in any subject.

**How Do I Prove I’ve Completed My BS Degree if I’m Applying to a Dietetic Internship Program Before I Graduate?**

When you apply to dietetic internship programs, the UF DPD Director will provide you with a “Declaration of Intent to Complete” form. You will complete this form and submit it to FSHN Student Services. The information is verified by Student Services, and then submitted on the DICAS website. It serves as temporary “proof” that you’re on your way to completing the undergraduate program.

Once you have actually graduated, the Director will provide you with six original signed copies of the “Verification Statement.” This form is your final proof that you did indeed complete the DPD, and it will only be issued to you after your graduation is certified by UF.

**Where Can I Obtain More Information About Dietetic Internship Programs?**

The [Academy of Nutrition and Dietetics](https://www.eatright.org) website provides the most up-to-date information about internship programs. You can access a [listing of each program](https://www.eatright.org/education/practice) to find information on cost, length of internship, internship director, and area of specialization. The Academy website also has a direct link to the individual programs’ websites which provide detailed information about the programs.

Another resource is the [Applicant Guide to Supervised Practice Experience](https://www.eatright.org/education/practice), a valuable tool that describes many of the dietetic internship programs that are available. The Guide provides detailed information such as the usual number of applications received by individual programs and answers to frequently asked questions. This Guide is available in online format; a copy is available through the student services office.

**Do Dietetic Internships Offer Graduate Courses?**

Some, but not all, dietetic internships offer graduate courses. Internships vary from offering no graduate credits to a combined Masters/Dietetic Internship. Students who are interested in graduate
How Do I Apply for a Dietetic Internship Program?

The Academy of Nutrition and Dietetics developed an online application process for dietetic internships. The system, Dietetic Internship Centralized Application System (DICAS), allows applicants to submit all of their application materials online and internships will access the information for DICAS. There is a $40.00 fee for the first application and $20.00 for each additional application.

How Much Does a Dietetic Internship Program Cost?

Costs vary widely, so you should check with each program about required expenses. Most accredited dietetic internships associated with regionally accredited university graduate programs qualify for government-sponsored loan programs. You should check the individual internship’s website to see if financial aid is available at a specific dietetic internship. Additionally, numerous scholarship and loan opportunities are available to help pay the costs of the supervised practice experience.

What are the Characteristics of a Successful Applicant for Dietetic Internships?

Being a successful applicant to a dietetic internship starts long before you fill out the application forms. Although programs may have varying selection criteria, applicants who receive appointments to supervised practice programs tend to have the following characteristics:

- A cumulative GPA of 3.0 or higher (although a 3.2 or higher is recommended)
- A 3.0 GPA or higher in professional courses
- A 3.0 GPA or higher in biological and physical science courses
- Significant paid or volunteer work experience (recommend at least 600 hours in nutrition-related positions)
- Strong letters of recommendation
- Leadership in organizations
- Willingness to relocate
- Clean criminal history (programs require criminal background check)

How Can I Improve My Chances of Being Admitted to a Dietetic Internship Program?

A student has no guarantee of receiving a DI appointment. The national average match rate is about 50%. The University of Florida DPD students have higher statistics, but match rates vary from year to
Internships continue to become more competitive. In order to increase your chances, you should:

- Investigate programs early to identify their admission criteria.
- Maintain a grade point average over 3.0 (although 3.2 or higher is more realistic).
- Get dietetics related work or volunteer experience (hospital experience is considered valuable; college foodservice, camp foodservice, nursing home foodservice, and community nutrition programs are also very good; many other types of work experiences can also be valuable). Start early and consider ways to get experience in more than one area of practice.
- Seek opportunities to conduct/assist with nutrition/dietetics research.
- Participate in activities that demonstrate leadership (college/university clubs, sports, community service projects, organizations).
- Get to know dietetics faculty members through faculty office hours, FSHN club, or independent study. You will need letters of recommendations from them.
- Apply to more than one program, but not an excessive number. (Successful applicants apply to an average of 3-5 programs).
- Be flexible and willing to relocate. Explore programs outside of Florida!

What is the Timeline for Applying to Dietetic Internships?

**Freshman/Sophomore Year**
- Maintain good grades – aim for 3.2 or higher.
- Become active in organizations or community activities
- Join the Food Science and Human Nutrition (FSHN) Club
- Join the Academy of Nutrition and Dietetics (only students who are Academy members are eligible for scholarships and awards)
- Obtain dietetics-related work or volunteer experience – your end goal is 600+ hours!
- Join the Gainesville Academy of Nutrition and Dietetics (GAND)

**Junior Year**
- Begin reviewing the AND website and the Applicant’s Guide to Supervised Practice
- Attend the junior orientation for dietetic internship planning, called Dishing Up Dietetics, in Spring semester
- Get to know your faculty advisor and other FSHN faculty members. It is important for faculty to get to know you if you intend to ask them to write a letter of recommendation. (Remember, you need three letters of recommendation for your application)
- Get dietetics-related volunteer or paid work experience – aim for 600+ hours
- Get involved in activities in the FSHN Club – run for office or chair a committee
- Continue membership in the Academy of Nutrition and Dietetics (required in junior year or after 60 credits)
- Continue membership in the Gainesville Academy of Nutrition and Dietetics (GAND)
- Maintain good grades – aim for 3.2 or higher

**Senior Year**
- Call, email, or write internships for additional information and application
- Maintain good grades – aim for 3.2 or higher
- Get even more involved in the FSHN Club
Continue membership in the Academy of Nutrition and Dietetics.
Continue involvement with the Gainesville Academy of Nutrition and Dietetics (GAND)
Take the Graduate Record Examination (GRE)
Select 3-6 internships that match your interests and qualifications
Check deadlines and apply on time – usually mid-February (but can be earlier so be sure to check the deadlines)
Appointment match date – April
If you match in April – Congratulations!!!
If not, then:
• See DPD Director for alternatives
• Keep trying to match in the post-match period from April to August (not all programs fill their classes during the match)
• Continue to get experience if necessary
• Apply for internships again for the Fall match (deadline in September) for November appointment date (DI usually begins in January)

How Can I Get Help with the Dietetic Internship Application Process?
In the Spring Semester, seniors in the dietetics major present an orientation program for all DIE majors. It is highly recommended that junior dietetics students attend to learn about dietetic internship planning. The DPD director works in conjunction with graduating DPD seniors to offer a “Dishing up Dietetics” workshop during the spring semester each year.

In addition, as part of the Dietetics Seminar course (DIE4505), guidance is provided in writing personal statements for the application packet. Class attendance is **required**.

What’s this “Computer Matching” Thing All About?
Most dietetic internship programs participate in computer matching with D&D Digital. The process includes rank ordering the internships to which you are applying, and then the internship programs rank order their applicants. In April, students learn if they receive a dietetic internship match to one of their programs. As mentioned earlier, the national computer matching result for the past four years has been about 50%, which means that half of the students applying for internships received a match and the other half did not. University of Florida DPD match rates are higher, but there are students graduating from the UF program who may not receive a match.

Computer match information from D & D Digital is available from the Program Director or on the **D&D Digital website**. There is a $50.00 fee for computer matching to D&D Digital. In Fall 2010, the application process for internships moved to DICAS, a centralized online system.

What Do I Do if I Don’t Receive a Dietetic Internship Match?
When students submit an application to a Dietetic Internship program, they need to realize that the selection process is very competitive, and a strong application packet does not guarantee a match to an internship program. The applicant pool is national, and you are in competition with many other
students from across the country. If you do not receive an appointment in the match, you should see
the Program Director about available internship programs that might have openings. You should also
allow your name to be published on the list of applicants who did not match – it can increase your
chances of matching even after the computer match is over! It is still possible to obtain an internship
in the post-match period, although it does require an additional application process.

If you are still not successful, you should begin to re-evaluate your credentials, identify your strengths
and weaknesses (which we all have), and think about ways to better highlight those strengths and
improve those weaknesses.

- Evaluate how you can improve your qualifications
- Look at additional Dietetic Internship Programs
- Obtain a job related to nutrition/dietetics
- Reapply

Students who didn’t match should contact the DPD Program Director immediately to discuss the
situation and plan for future matches. The dietetics advisors in the FSHN Department are interested
in and concerned about students and can be very helpful in providing support. Don’t give up, there
are alternatives! Persistent, qualified applicants nearly always find placement.

**After Completing a Dietetic Internship Program, What Do I Do Next?**

You must apply to take the Registration Examination for Dietitians. Candidates take their exam on a
computer at a Pearson VUE testing center, which are located throughout the country. The exam can
be scheduled following completion of the registration eligibility application procedure, which is
discussed in the dietetic internship program. The exam is approximately three hours long and
includes questions on food and nutrition, nutrition services (community and clinical), education and
research, foodservice systems, and management. Upon passing the exam, and notification by the
Commission on Dietetic Registration (CDR), you will be a Registered Dietitian Nutritionist (RDN). For
more information, see the [Pearson VUE Registration Examination for Dietitians Handbook for
Candidates](#).

**What is State Licensure or Certification?**

Some states require that dietitians be licensed by a State Licensing Board to be able to practice
dietetics. In many states the requirements for licensure are similar to those for dietetic registration.
Florida requires a license for most areas of practice (see the [Florida Health website](#) for information).
If you are planning on practicing in another state, you should contact the state dietetic association to
see if there are licensure/certification requirements.
What Should I Know About Professional Associations?

The Academy of Nutrition and Dietetics (AND)  
http://www.eatright.org

The Academy of Nutrition and Dietetics is the nation’s largest professional organization for dietitians. Students enrolled in an accredited dietetics program have the opportunity to become a student member of the organization. Benefits of membership include:

- The *Journal of the Academy of Nutrition and Dietetics* (JAND)
- Academy’s Members-only website, which includes access to the Evidence Analysis Library (EAL)
- Student Center with information about career planning, student news, and a listserv
- Continuing education programs and materials
- Professional publications
- Member discounts on publications and merchandise
- Annual meeting discounts
- Membership opportunities in dietetics practice groups (DPG)
- Membership in state dietetic association
- Job announcements
- Scholarship opportunities

The most important advantages to Academy student members are the eligibility for AND-sponsored scholarships, the Journal, networking, and the chance to improve your marketability. Students get all of this for a small annual membership fee – currently $58. Although you are strongly encouraged to join as a freshman or sophomore, membership isn’t required until you are a junior and senior. To be a student member of the Academy, you must complete a membership application and submit the dues payment; available on the Academy website.

The Florida Academy of Nutrition and Dietetics (FAND)  
http://www.eatrightflorida.org

The Florida Academy of Nutrition and Dietetics is Florida’s professional organization for dietitians. Students who are AND student members are automatically members of the FAND (unless a different state affiliation is selected on the membership application). Advantages of membership include:

- Newsletters and publications
- Annual meeting discounts
- Scholarship opportunities
- Networking and more

The Florida Academy of Nutrition and Dietetics hosts an annual symposium every summer, usually in July. This three-day symposium includes national speakers, an extensive exhibit hall, and many opportunities to network with dietetics professionals and other students. You are highly encouraged to attend. FAND offers student stipends for students who are willing to volunteer during the meeting.

The Gainesville Academy of Nutrition and Dietetics (GAND)  
www.eatrightgainesville.org

The Gainesville Academy of Nutrition and Dietetics is one of Florida’s newest professional organization for dietitians. You are encouraged to join to get to know local dietitians. This provides
great opportunities for networking and mentoring. The student membership fee is $10.00 per year. Some membership advantages include:

- Educational programs
- Networking
- Leadership opportunities (National Nutrition Month)
- Involvement in community
- Committee membership

**What are My Options if I’m Not Interested in Becoming an RD/RDN?**

A degree from Food Science and Human Nutrition Department with a major in Dietetics provides a strong knowledge base in the sciences, including nutrition, as well as communication, problem solving, and teamwork skills. Graduates can pursue careers in nutrition education (through WIC), sales (including pharmaceutical, food and equipment sales), product development, foodservice management, and public policy or health fields.

Graduate school is another option to consider after graduation. There are many master’s degree programs in nutrition, health science education, business, exercise and sports science, and communication. You should take the Graduate Record Exam (GRE) if interested in graduate school.

DPD Graduates are also eligible to take the national examination to become a DTR (dietetic technician, registered) without completing the supervised practice experience. Information can be found [here](#).

**Dietetics Majors Listserv**

The FSHN Department maintains a listserv for dietetics majors. Information is regularly sent out regarding current professional information, volunteer or paid work experience opportunities, and reminders about meetings, deadlines, etc. All students in the dietetics curriculum should be subscribed to the listserv. Email Herschel Johnson (hdjohnson@ufl.edu) to be added to the listserv.

ACEND Accreditation Standards for Didactic Programs in Nutrition and Dietetics
Leading to Supervised Practice, Standards implemented in 2017

Domain 1. Scientific and Evidence Base of Practice: integration of scientific information and research into practice.
Knowledge: Upon completion of the program, graduates are able to:

KRDN 1.1 Demonstrate how to locate, interpret, evaluate and use professional literature to make ethical, evidence-based practice decisions.
KRDN 1.2 Use current information technologies to locate and apply evidence-based guidelines and protocols.
KRDN 1.3 Apply critical thinking skills.

Domain 2. Professional Practice Expectations: beliefs, values, attitudes and behaviors for the professional dietitian level of practice.
Knowledge: Upon completion of the program, graduates are able to:

KRDN 2.1 Demonstrate effective and professional oral and written communication and documentation.
KRDN 2.2 Describe the governance of nutrition and dietetics practice, such as the Scope of Nutrition and Dietetics Practice and the Code of Ethics for the Profession of Nutrition and Dietetics; and describe interprofessional relationships in various practice settings.
KRDN 2.3 Assess the impact of a public policy position on nutrition and dietetics practice.
KRDN 2.4 Discuss the impact of health care policy and different health care delivery systems on food and nutrition services.
KRDN 2.5 Identify and describe the work of inter-professional teams and the roles of others with whom the registered dietitian nutritionist collaborates in the delivery of food and nutrition services.
KRDN 2.6 Demonstrate an understanding of cultural competence/sensitivity.
KRDN 2.7 Demonstrate identification with the nutrition and dietetics profession through activities such as participation in professional organizations and defending a position on issues impacting the nutrition and dietetics profession.
KRDN 2.8 Demonstrate an understanding of the importance and expectations of a professional in mentoring and precepting others.

Domain 3. Clinical and Customer Services: development and delivery of information, products and services to individuals, groups and populations.
Knowledge: Upon completion of the program, graduates are able to:

KRD 3.1 Use the Nutrition Care Process to make decisions, identify nutrition-related problems and determine and evaluate nutrition interventions
KRD 3.2 Develop an educational session or program/educational strategy for a target population.
KRD 3.3 Demonstrate counseling and education methods to facilitate behavior change and enhance wellness for diverse individuals and groups.
KRDN 3.4 Explain the processes involved in delivering quality food and nutrition services.
KRDN 3.5 Describe basic concepts of nutritional genomic.
Domain 4. Practice Management and Use of Resources: strategic application of principles of management and systems in the provision of services to individuals and organizations.

Knowledge: Upon completion of the program, graduates are able to:

KRD 4.1 Apply management theories to the development of programs or services.
KRD 4.2 Evaluate a budget and interpret financial data.
KRD 4.3 Describe the regulation system related to billing and coding, what services are reimbursable by third party payers, and how reimbursement may be obtained.
KRD 4.4 Apply the principles of human resource management to different situations.
KRD 4.5 Describe safety principles related to food, personnel and consumers.
KRD 4.6 Analyze data for assessment and evaluate data to be used in decision-making for continuous quality improvement.

The program’s curriculum must provide learning activities to attain the breadth and depth of the required curriculum components and core knowledge. Syllabi for courses taught within the academic unit must include these learning activities with the associated KRDNs.

Learning activities must prepare students for professional practice with patients/clients with various conditions, including, but not limited to overweight and obesity; endocrine disorders; cancer; malnutrition and cardiovascular, gastrointestinal and renal diseases.

Learning activities must prepare students to implement the Nutrition Care Process with various populations and diverse cultures, including infants, children, adolescents, adults, pregnant/lactating females and older adults.

Learning activities must use a variety of educational approaches necessary for delivery of curriculum content, to meet learner needs and to facilitate learning objectives.
